

CLAIMS

1. This invention to be used with existing and new flush tanks that have a water supply and a Float shut-off valve.
2. The flush valve adapter includes a first operator handle operably mounted on an exterior portion of the existing or new flush tank to provide a partial flush.
3. The flush valve adapter includes a second operator handle operably mounted on an exterior portion of the existing or new flush tank to provide a full flush.

Note:

The partial flush valve adapter (claim 2) will be used 80 to 85 percent of the flushings.
